Managing Director's Message

With the blessings of late His Holiness Dr. Syedna Mohammed Burhanuddin Saheb (TUS), after five decades of similar business experience, Golden Harbour dropped anchor on the shores of Dubai in the late 80's with a vision to supply metal products to the marine, offshore, oilfield and Industrial sectors.

With a humble beginning from a small showroom at Nasser Square in Deira Dubai, today we operate from a 5000 sq. ft modern fully equipped, computerized office, backed by state of art 100,000 sq ft + warehousing facility in Al Qouz & Al Jadaf. With branch offices & showrooms in Abu Dhabi, Bahrain & Cairo we have positioned ourselves as a preferred source of supply in the MENA region. Our success has been due as much to our corporate philosophy of unwavering commitment to quality and service as to our teams of highly skilled and dedicated staff who strive continuously to fulfill the company's vision.

We also owe our success to the continued support of our customers. We are equally thankful to the UAE government and the Ruling family, whose exemplary leadership and vision have helped, craft a vibrant business environment positioning the country as trading and commercial Capital of the Middle East.

But we are also aware that all growth, in its wake, also brings new challenges. And we, at Golden Harbour, are geared up to meet them. And as our past record amply shows, we are confident that we will meet all the emerging challenges in our field of business competently and efficiently forging long term partnerships with our customers & principals.

Huzaifa S.T.
Managing Director

Specialised in Copper Nickel Pipes & Pipe Fittings, Hydraulic / Instrumentation Tubes & Compression Tube Fittings, Stainless Steel Pipes & Pipe Fittings, Extensive & Unlimited Range of Valves and Flanges in DIN / ANSI / JIS standard

Company Introduction

A Trading House with more than 75 Years of Experience in providing Quality Products & Excellent Service at Competitive Price

Golden Harbour, established in the late 80's, is one of the region's leading agents, importers, distributors, stockiest and suppliers of specialized Oil and Gas engineering products, Offshore, Onshore, Marine & Industrial products, comprising of a comprehensive range of Instrumentation, High Pressure Hydraulic, Tubes & Compression tube fittings, Copper Nickel pipes & fittings, Stainless Steel pipes & fittings, alongwith Valves and Non-Ferrous items in the form of bars, flanges, pipes, fittings, sheets tube & pipe clamps.

Golden Harbour is ISO 9001:2015 certified with a well-established Quality Management System. The company currently operates from the Group's custom built state-of-the-art 40,000 sq. feet sprawling corporate headquarters in Al Quoz Dubai (U.A.E.). With a 100,000 sq. feet offices/warehousing set-up in Dubai ship docking center Al-Jadaf, strategically located office cum warehouse facilities in Abu Dhabi and Jebel Ali Free Zone (Jafza), a retail showroom in Deira-Dubai and a representative office in Bahrain, the company is able to stock 25,000 line items at any given time and cater to all major Oil & Gas companies, offshore platforms & shipyards in Middle East, Africa & Asian region.

Golden Harbour forms strategic alliances with selected Principals only and sources quality certified products from reputed original equipment manufacturers around the world. The company is now synonymous with providing customers with premium products at extremely competitive prices on a timely basis. Having a substantial stock holding of essential running items puts us in an enviable position to offer ex-stock delivery for most of the products. Golden Harbour is present at several leading exhibitions around the world, either visiting or having a stand, which gives us an ideal opportunity to expand our business portfolio.

Golden Harbour is a socially responsible company, with careful consideration of ethics, initiatives and actions that benefit not only our valued customers and staff but also protect the interests of the community and society as a whole. We firmly believe that by inculcating this concept in our daily activities allows us to improve our company's overall image and reputation and which in turn open doors to unlimited and exciting new possibilities and opportunities.

Want to experience a most rewarding and satisfying experience in doing business, Golden Harbour is the company to fulfil that desire. Come and join hands with us 😊

QUALITY POLICY

In the quest to create a benchmark in quality products & services Golden Harbour LLC (An ISO 9001:2015 QMS Certified Company) continues to be a High Class Trading Company mainly engaged in importing, stocking, distribution & supply of high quality metals, Marine, offshore oilfield and industrial products and services.

The management is committed in understanding every single requirement of customers accurately & appropriately and then efficiently providing them with the right product solution at a reasonable price first time & every time.

The quality policy is based on the following main fundamental principles:

- Understanding every requirement accurately.
- Offering the right Product Solution.
- At Reasonable Prices
- Supplying Defect Free Products.
- JIT – Delivered – Just in Time.
- Risk based thinking

To ensure that the policy is successfully implemented, the quality policy shall be effectively communicated to all staff and accordingly trained so as to be responsible for identifying and ensuring that the correct procedures are followed to meet the policy requirements.

Objectives needed to ensure that the requirements of this policy are met and that continual improvement is maintained in line with the spirit of this policy, will be set, determined and monitored at Management Review meetings.

AGENCIES

Since 1855 **Crane** has been the world's leading innovator and pioneer of practical flow control solutions addressing and exceeding our customers' needs to enable them to operate better, faster and safer. **Crane I&S, HOKE** offers a comprehensive portfolio of instrumentation and sampling products and solutions:

HOKE is a Manufacturer of Precision Fluid Control Solutions, Like High Pressure Tubes & Pipe Fittings, Valve, Flanges & Mono Flanges, Sampling Cylinders, Quick Release Coupling & Manifolds. Having started their offices in 1925, HOKE/GYROLOK is a well established brand, registered/approved with all major Oil & Gas companies all over the world.

GO REGULATOR is also a part of Crane, which enable Crane to meet customer's requirements of HIGH PRESSURE REGULATOR & VALVES.

GYROLOK[®] XP Tube Fittings For Mission Critical Applications

Standard Features

- > Standard 1 ¼ turns make up procedure
- > Works with standard & 1/8 hard tubing
- > Available from 6mm to 38mm / ¼" to 2" sizes
- > Available in a full range of corrosion resistant alloys including 6mo, HC, Super Duplex etc.

Circle Seal Controls offers a wide choice of valves and controls for applications including OEM, medical, chemical, petrochemical, energy, and food & beverage. Products range from discrete components to integrated assemblies to complete fluid control systems.

Circle Seal Controls' comprehensive product line, engineering expertise, broad manufacturing capabilities, stringent quality control, and responsive customer service makes us well qualified to address your fluid control needs.

Solenoid Valves - pressure range choices are vacuum to 3000 psig (207 barg) and vacuum to 6000 psig (404 barg).

Shutoff Valves - include plug, 3-way selector, miniature, glove, pneumatically actuated, micro-metering fingertip, and angle styles.

Relief Valves - pressures range from vacuum to 10,500psig.

Classic Filters are a UK based manufacturer with a global distributor network specialising in particulate & coalescing filter housings and elements.

Established in 2001, **Classic Filters Ltd.** manufactures high-quality, bonded microfiber filter elements and filter housing for use in both gas and liquid applications.

Disposable In-Line Filters

Offer end-users the ultimate 'convenience' solution to filtration, allowing replacement to be performed in seconds, thus minimising downtime of equipment and process.

Stainless Steel Filter Housings

Stainless steel filter elements are comprised of five layers of 316 mesh, sintered together to form an integrated porous element.

Microfibre Filter Elements

Offer exceptional filtration efficiency at very low pressure drops and being +90% void volume give a very long service life.

Pressfitting Systems

The most effective and efficient way to make an installation.

Pressfitting is a joining between pipes with fittings fitted through electro-mechanical pressing machines. Pressing permanently deforms the fitting on the pipe thus leading to a perfect mechanical joint, while the O-Ring provides for the hydraulic tightening connection. Pressing provides for a constant quality joining, easily reproduced and with a minimum physical effort by the operator.

Many different applications, result reliability.

Pressfitting is a unique method to make installations inside different sectors, civil and industrial as well. Among the house walls, for example, Pressfitting can be used for potable water pipes, heating and gas. At the industrial level, Pressfitting is suitable for compressed air, cooling / heating, process water and fire-fighting systems.
